                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   *NOTE: This is a "working draft' sequence. It currently consists of 22 contriges. The three order of the pieces is not known and their order in this sequence record is anot known and their order in this sequence record is enhitzery. Capp between the configs are presented as runs of N but the exact sizes of the gaps are unknown. This record will be updated with the finished sequence as soons as it is available and the accession number will be preserved.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      ocounts of 1339 by in length

Site 2: RockW (destroyed): RNA source anonymous pool of 6
male brains as errong 2.3.7 yo. Libhary is olido-dr
primed and directionally cloned (BookW site is destroyed upon cloning). Average insere size 1.5 Rb, insert size tange 1.3 Rb. Libhary is normalized and enriched for full-length Colones and was constructed by C. Gruber (Invitrogen). Research Genetics tracking code 0.19. Note: 18 a MHP MOSC Library 18 normalized and enriched for 18 a MHP MOSC Library 18 normalized and enriched for 18 a MHP MOSC Library 18 normalized and enriched for 18 a MHP MOSC Library 18 normalized and enriched for 18 a MHP MOSC Library 18 normalized and enriched for 18 a MHP MOSC Library 18 normalized and enriched for 18 a MHP MOSC Library 18 normalized and enriched for 18 a MHP MOSC Library 18 normalized and enriched for 18 a MHP MOSC Library 18 normalized and enriched for 18 a MHP MOSC Library 18 normalized and enriched for 18 a MHP MOSC Library 18 normalized and enriched for 18 a MHP MOSC Library 18 normalized and enriched for 18 a MHP MOSC Library 18 normalized and enriched for 18 a MHP MOSC Library 18 normalized and enriched for 18 a MHP MOSC Library 18 normalized and enriched for 18 a MHP MOSC Library 18 normalized and enriched for 18 and 18 normalized and enriched for 18 normalized and enriched for 18 normalized and enriched for 18 normalized and enriched for 18 normalized and enriched for 18 normalized and enriched for 18 normalized and enriched for 18 normalized and enriched for 18 normalized for 18 normalized for 18 normalized for 18 normalized for 18 normalized for 18 normalized for 18 normalized for 18 normalized for 18 normalized for 18 normalized for 18 normalized for 18 normalized for 18 normalized for 18 normalized for 18 normalized for 18 normalized for 18 normalized for 18 normalized for 18 normalized for 18 normalized for 18 normalized for 18 normalized for 18 normalized
